

PUNEETH VEMURI

+91-6360121971 — puneethvemuri@gmail.com — [LinkedIn](#) — [GitHub](#) — [Portfolio](#)

OBJECTIVE

Passionate and adaptable technology enthusiast with a strong foundation in programming, problem-solving, and system design. Eager to contribute to building scalable, efficient, and secure solutions while continuously learning and adapting to new domains. Thrive in challenging environments where clean code, data-driven insights, and innovation come together to deliver impactful results across diverse business needs.

EDUCATION

K S Institute of Technology, Bangalore 2022 – 2026
B.E. Computer Science & Engineering **CGPA: 8.55/10**

Sri Chaitanya Techno School, Bangalore 2021 – 2022
12th (CBSE) **Percentage: 76.6%**

SKILLS

- **Programming Languages:** Python, Java, JavaScript, Kotlin, SQL, HTML, CSS
- **Frameworks/Libraries:** Django, Flask, FastAPI, React, Jetpack Compose
- **Tools & Platforms:** Git, GitHub, Cursor, VSCode, SQL Developer, Firebase, Docker, Room Database, Retrofit
- **Databases:** MySQL, PostgreSQL, MongoDB
- **Architectures:** MVVM Architecture

EXPERIENCE

MindMatrix.io (CL Infotech Pvt. Ltd.) Feb 2026 – May 2026
Android App Development Intern

- Completed a hands-on internship focused on Android App Development using Kotlin and Generative AI.
- Worked on multiple Android applications and developed “Raitha-Bharosa Hub,” a smart sowing assistant for Karnataka farmers featuring bilingual support, weather integration, and offline functionality.
- Gained practical experience in Jetpack Compose, MVVM Architecture, Room Database, Retrofit, Firebase, and modern mobile application development practices.

CodSoft Dec 2023 – Jan 2024
Web Development Intern

- Completed a 4-week virtual internship in Web Development, contributing to multiple projects and receiving excellent performance remarks.
- Demonstrated strong technical skills and dedication, as recognized in the internship certificate.

PROJECTS

InfoPulse — *React, Chart.js, Gemini API, OpenWeatherMap* [GitHub](#) — [Live](#)

- Built an interactive dashboard aggregating 10,000+ live cryptocurrency price updates (Chart.js), AI-powered market analysis (Gemini API), and real-time global weather forecasts (OpenWeatherMap).
- Designed a searchable news feed with 5+ category filters, fetching 100+ daily articles via NewsAPI integration.
- Implemented a responsive UI with dynamic Vanta.js animated backgrounds, achieving a 95% user satisfaction rating in usability tests.
- Demonstrated expertise in multi-API integration, managing 3+ concurrent data streams, and state management for seamless data visualization.

Trip Planner AI — *CrewAI, OpenRouter, LangChain, Streamlit* [GitHub](#) — [Live](#)

- Developed an intelligent multi-agent trip planning system using CrewAI framework with 4 specialized AI agents (Destination Researcher, Flight Booking Specialist, Itinerary Planner, Budget Analyst) orchestrated via LangChain.

- Integrated OpenRouter API (Mistral-7B) for LLM access, implemented real-time agent progress tracking with Streamlit, and built automated PDF export functionality with dynamic formatting.
- Deployed on HuggingFace Spaces and Streamlit.

Raitha-Bharosa Hub — *Kotlin, Jetpack Compose, MVVM, Room DB, Retrofit*

[GitHub](#)

- Architected a smart mobile sowing assistant tailored for Karnataka farmers, integrating bilingual support to lower regional user accessibility barriers.
- Implemented reliable real-time weather tracking via Retrofit REST APIs alongside an offline-first sync mechanism leveraging Room Database storage.
- Programmed state management using Clean MVVM Architecture, Jetpack Compose components, and live cloud sync backups utilizing Firebase.

Abhayam IoT Women Safety Device — *ESP32, A9G Module, C++*

[GitHub](#)

- Developed a compact IoT women's safety device using an ESP32 and A9G module that sends instant SOS alerts with live GPS location to emergency contacts.
- Designed for portability with a rechargeable battery, ensuring low-latency communication for enhanced personal safety.

"A Survey on Multimodal Approaches for 3D Face Recognition in Occluded Environments", *International Journal of Advanced Research in Computer and Communication Engineering (IJARCCE)*, DOI: 10.17148/IJARCCE.2025.14655.

HACKATHONS & CERTIFICATIONS

- **Adobe India Hackathon:** [Round 1 - Online MCQ Assessment + Coding].
- **Hacker-Ring Hackathon (organized by 0xDay):** Developed an AI AgriiBot that uses a CNN for disease detection and IoT sensors for automated, precision farming.
- **Certifications:** Introduction to Generative AI Learning Path Specialization - Coursera — Introduction to Software Engineering - Coursera — Career Essentials in GitHub Professional Certificate - LinkedIn learning — Crash Course on Python - Coursera — Introduction to Computer Vision and Image Processing - Coursera.
